Cogent are proud to introduce the ONLY son of Steinhauers Samson Lemonhead available in the UK following his father's footsteps as a leading JPI sire at +142. With production, health traits and type, Devinci brings a lot to the table. He offers +775lbs of Milk, +3.1 Productive life positive Daughter Fertility and low Somatic Cell Score and at 1.70, Devinci is Cogent's No.1 PTAT Sire.

His maternal line originates from the recently dispersed Grazeland herd of the King family of Creston, Ohio. The farm utilised intensive rotational grazing supplemented by a TMR mix. Production and functionality were of paramount importance in the herds breeding programme. The cow family itself is very versatile having excelled at Grazeland but also going on to perform well in larger scale herds. Devinci's dam is currently housed in a 900 cow herd predominantly Holstein and has racked up a 1st lactation record at almost 10,000kgs milk with good components.

DEVINCI IS NOW AVAILABLE TO ORDER.
